Family	"Has appellation/is appellation of" relationship ⇔ name*	■		■	
	"Assigned/is assigned to" relationship ⇔ identifier*	■	■		
	Type of family*	■	■		
	Dates of family*	■	■	■	
	Places associated with family*		■	■	
	Language of family*		■		■
	Field of activity*		■		

Errata in 2009 published text

Section 3.4 (Entity Definitions)

Definition of Manifestation (p. 28)

The physical embodiment of an expression of a work. [FRBR, modified]

(Explanation: The definition in FRAD is the same as that in FRBR, it is not modified.)

Definition of Name (p. 31)

A character, word, or group of words and/or characters by which an entity is known in the real world. [FRBR, modified]

Section 5.3.1 (Relationships between Persons)

Official relationship (p. 62)

Example

The relationship between the person known as John Fitzgerald Kennedy and that person's official name his identity as President of the United States, for the period 1961-1963.

Attributive relationship (example at top of p. 63)

Example

The relationship between the person known as Pseudo-Brutus Marcus Junius Brutus and the person known as Marcus Junius Brutus, Pseudo-Brutus whose to whom the former's works have been erroneously attributed to Marcus Junius Brutus.

(clean version)

The relationship between the person known as Pseudo-Brutus and the person known as Marcus Junius Brutus, to whom the former's works have been erroneously attributed.

Section 5.3.6 (Relationships between Corporate Bodies)

Hierarchical relationship
2ⁿᵈ paragraph (bottom of p. 67)

This relationship is usually expressed in authority data through the hierarchical structure of the authorized form of name given to the subordinate body (to include including the preferred form of name of the higher level body), through see references, and/or explained through information notes or cataloguer's notes:

Section 5.4.1 (Relationships between Names of Persons)

Earlier name relationship (p. 75)

Examples

> The relationship between a name of a person who was made Earl of Beaconsfield, thus acquiring the name "Benjamin Disraeli, Earl of Beaconsfield" and that person's earlier name, "Benjamin Disraeli".

> The relationship between a name of a person who married a Mr. Nichols, thus acquiring the name "Charlotte Nichols" and that person's earlier name, "Charlotte Bronte".

Later name relationship (example at top of p. 76)

Examples

> The relationship between a name of a person whose name prior to marrying Robert Browning was "Elizabeth Barrett" and that person's later name, "Elizabeth Barrett Browning".

Chapter 6 (User Tasks)
Table 4

Section for Person (p. 84-86)

Delete line for *Pseudonym relationship* to *name of person* on p. 86. The relationship is correctly represented earlier in the table (previous page) as between *Pseudonymous relationship* and *person*.

Person	"Has appellation/is appellation of" relationship ⇔ name	■		■	
	"Assigned" relationship ⇔ identifier	■	■		
	Dates of person		■	■	■
	Title of person	■	■		
	Gender*		■		
	Place of birth*		■		
	Place of death*		■		
	Country*		■		■
	Place of residence*		■		■
